HNRS 089.001 | Medicine and Narrative: Writing COVID / Writing Us
M, 2:00 pm - 4:30 pm. Instructor(s): Terry Holt. Enrollment = 20.
A workshop in autobiographical and creative short story, focusing on the complex connections between story-telling, interpretive skill, and the practice of medicine. Students will write and present autobiographical and and creative short stories about illness and medical care; the seminar will meet weekly to discuss these stories, attempting to identify and articulate the key issues each story expresses about what it means to be sick, what it might mean to take care of others in their illness. The writing and (especially) interpretive skills acquired in this workshop are directly valuable to anyone contemplating a career in medicine, but are equally valuable to anyone who might at some point encounter (in themselves or in someone they care for) the trauma of illness. In addition to the weekly workshop, participants will have one-on-one conferences with the instructor (himself an MD with an international reputation as a writer). A semester-long journal, focusing on the reverberations of the pandemic on the writer's daily (actual and interior) life, will form the basis for a final project, which may (at student option) be in the form of written narrative, an audio composition, or a film, composed using the tools available at the

HNRS 350.001 | Learning the Art of Medicine
T, 6:00 pm - 7:00 pm. Instructor(s): Matthew Nielsen. Enrollment = 16.
This course is designed to supplement knowledge obtained through the traditional pre-medical curriculum in order to enhance students¿ development as health care providers. It has the following objectives:

1) Work in the health professions provides many different pathways for individuals to find meaning, purpose, and impact in the world. We will explore a variety of perspectives through a series of invited speakers from our community.
2) Broad and overlapping currents in the organization of medical care, payment for healthcare services, performance improvement, government regulation, and innovation have been shaping the environment within which care is delivered in this country for decades. These will continue to shape the environment for the decades to come. The seminar will provide students with an overview of changes in the delivery of medical care across several of these areas.

HNRS 390.001 | Medieval Jesus
TR, 9:30 am - 10:45 am. Instructor(s): Brett Whalen. Enrollment = 24.
Jesus Christ, understood by Christians as the Son of God, was seemingly everywhere in the European Middle Ages: featured on stain-glass windows, illuminated in manuscripts, carved in stone on church facades, performed in passion plays, invoked in sermons, celebrated during the Christian Mass. As represented in the medieval world, there were multiple and diverse iconographies of Christ: the child in manger, the miracle-worker, the man of sorrows on the cross, and the dreadful judge at the end of time to name a few.

This course will explore the ¿medieval lives¿ of Jesus in Christian texts and artistic traditions, focusing

HNRS 390.002 | Globalization and Travel in the Middle Ages
TR, 9:30 am - 10:45 am. Instructor(s): Jennifer Grayson. Enrollment = 24.
Historians conventionally date the start of ¿globalization¿ to either the 1500s (when Europeans reached the Americas) or as late as the 1970s. Yet many characteristics of ¿global¿ societies were present much earlier, during the middle ages: These include long-distance trade, voluntary and forced migration, multi-ethnic empires, and the transmission of cultural forms across long distances. In fact, medieval people routinely traveled across thousands of miles and encountered people with different cultures, religions, social structures, and beliefs. Many wrote about the experience of doing so. This upper-level seminar will introduce students to the ¿global middle ages¿ and the history of travel in the medieval period. Students will learn about how and why medieval people traveled, and they will read and analyze a variety of medieval travel narratives originally composed in Latin, Hebrew, Arabic, Norse, and Chinese.

SPCL 400.301 | Spontaneous Overflow: Poetry as Critical Theory

Student Instructor: Boatemaa Agyeman-Mensah
Faculty Mentor: Tyree Daye
M, 5:00 pm - 7:00 pm
103 Greenlaw Hall

Course Description: Why is a stanza shorter than a paragraph? Why is a poem shorter than prose? Many believe this is because poetry is a bite sized container for simple truths. The reduction of words is read as metaphorical for the larger job of the poet¿to cut out the fat that buries what we know to be true.

TITLE: The Elements of Politics: The American Founding

IDEAS IN ACTION GEN EDS: FC-VALUES

COURSE DESCRIPTION
This seminar will examine fundamental political questions by reading selected philosophical, political, and legal texts bearing on the American Founding. Our goal will be to understand both the intellectual underpinnings of the Founding and how each text sheds light on how humans can (or should) live together in a political society. Through this lens we will examine the relationships and tensions between the individual and the community, virtue and politics, tradition and philosophy, freedom and justice. We will read thinkers like Hobbes, Locke, Rousseau, Burke, Franklin, and Tocqueville, each of whose work informs or reflects on American self-government. We¿ll also read the Declaration, the Constitution, and the Federalist Papers, examining the view of human

TITLE: Shakespeare's The Tragedy of King Lear and The Tempest

IDEAS IN ACTION GEN EDS: FC-AESTH

COURSE DESCRIPTION
The primary purpose of this course is to help students learn how to enjoy great literature. To do so, we will slow down, read, and re-read. Each of our two readings¿King Lear and The Tempest¿is considered not only among Shakespeare¿s greatest plays but among the greatest of all works of literature without qualification. Our focus will be on a careful, detailed reading that explores not only the puzzling language of each work but also the many challenges to our understanding its implications, large and small. First, we¿ll read each play in its entirety. Then students will compose a preliminary essay. Then we¿ll re-read and discuss each section with reference to our sources of puzzlement. Along the way, we¿ll write further drafts of the original essay, refining and

Attributes: IDEA - FY - First Year Seminar, IDEA - Research and Discovery

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Experience and document North Carolina¿s Latin American and Caribbean history. This three-credit course combines field research, oral history, and service learning to understand the immigration and settlement of North Carolinians with Latin American and Caribbean ancestry. The course will address the ethical and practical aspects of the ethnographic method including the preparation, transaction and transcription of oral history interviews. Students will complete an independent research project using the New Roots Nuevas Ra¿ces initiative and spend spring break participating in oral history research and community-engaged learning in eastern North Carolina (March 12-17, 2023). An estimated 10% of course materials are in Spanish, so it is recommended that students have intermediate-advanced levels of Spanish language proficiency. Contact instructor Hannah Gill, hgill@unc.edu

TITLE: Knot Theory

IDEAS IN ACTION GEN EDS: FC-QUANT or FC-KNOWING

COURSE DESCRIPTION
Knots are everywhere around us, from the twists in our shoelaces to the tangled cords of electronic devices and even the structure of DNA. In this seminar, we will take a hands-on approach to learning how mathematicians describe and study knots and related concepts from the mathematical area of topology. This course will also serve as an informal introduction to the process of research mathematics: we will see how mathematicians formulate and refine conjectures, establish new theorems, classify mathematical objects, and about the utility of mathematical invariants. We will also discuss some real-word applications of the course material both practical (useful knots for climbing, sailing, and even for properly tying your shoes!) and scientific (applications in biology and

NOTE: Honors Carolina students can register themselves for SPRING 2023 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 18 during open enrollment.
MATH 233H.001 | Calculus of Functions of Several Variables
TR, 12:30 pm - 1:45 pm; Recitation: W, 2:30 pm - 3:20 pm. Instructor(s): Andrey Smirnov. Enrollment = 34.
Level: This is the Honors section of MATH 233. It offers a more demanding and deeper treatment than the regular sections. For example, there will be more emphasis on understanding theory than in other sections. Topics: Vectors in three dimensional space. Dot products and cross products and their applications. Functions of two and three variables. Polar and spherical coordinates. Graphs and contours. Multivariable calculus: partial derivatives, gradient. Curves in space. Surfaces: normal vector, tangent plane. Maxima and minima. Lagrange multipliers. Double and triple definite integrals, line integrals, Green's theorem.

PREREQUISITE: AT LEAST A B+ IN MATH 232 AT UNC OR A 5 ON THE BC CALCULUS EXAM.

MATH 381H.001 | Discrete Math
TR, 11:00 am - 12:15 pm. Instructor(s): Emily Burkhead. Enrollment = 35.
This course serves as a transition from computational to more theoretical mathematics, designed to provide you with the fundamental skills necessary for success in situations that require you to read, write, and reason precisely when working with mathematics. Special emphasis is given to improving your fluency in the use of mathematical vocabulary and notation when writing and critiquing mathematical proofs. Topics are from the foundations of mathematics: logic and proof techniques, set theory, relations and functions, counting methods, and basic number theory. In many ways, this will be the first ¿abstract¿ math course in your academic career. Although we will explore specific, concrete examples whenever possible, this course requires you to hone your ability to analyze and articulate the logical essence of the problems being studied. In other words, you will be expected to learn how to communicate coherently and persuasively using the language and the grammar of mathematics. PREREQUISITE: MATH 232 OR 283.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
MATH 383H.001 | First Course Differential Equations
TR, 9:30 am - 10:45 am. Instructor(s): Greg Forest. Enrollment = 35.
The main topic of this course is ordinary differential equations (ODEs) from two points of view. The first point of view is how ODEs model a wide range of applications from biology, chemistry, engineering and physics. In particular, the laws of chemistry, physics and Nature are not given as ¿formulas¿, rather, they are typically given in terms relations between a function and its derivatives. Classic examples include ¿population¿ models where the population might be humans, bacteria, radioactive species, or many other populations. The evolution of the population size is governed by rates for growth versus decay. The

second point of view is the methods to solve ODEs, studying a wide range of ODEs for which we exact solution methods are known as well as an even larger range of ODEs for which we must use approximate or numerical solution methods.

The honors section will place greater emphasis than other sections on understanding how the behavior of solutions is tied to the properties of the structure of the ODE itself. E.g., if the ODE is ¿linear¿ or ¿nonlinear¿ in the unknown function and its derivatives, how does that influence both the

Attributes: Research Intensive

Prerequisites: Math 233 and Math 383.

This is a topics course that will introduce the theory of stochastic differential equations at an advanced undergraduate level. We will be primarily working our way through An Introduction to Stochastic Differential Equations by L.C. Evans, but with some additional material on Markov chains introduced at the beginning to consider some related ideas in finite dimensional, discrete time stochastic systems. In addition, as appropriate we will explore some applications developed outside the text throughout the class related to topics like statistical physics, financial mathematics and sampling schemes. The problems and exercises will be largely from Evans throughout the class, with some Markov chain problems in the beginning being taken from the introductory sources on the topics, all of which will be shared with the class well in advance. We will not assume an advanced knowledge of probability at the outset, but if you have taken some courses in this direction you should also find something to learn as we progress through the material.

MATH 590 002 14881 TOPICS IN MATHEMATICS Lecture 3 A
(In Person On Campus Learners)
Bldg: Phillips Hall **Room:** 0383 **Days:** TuTh **Time:** 11:00 - 12:15 Applied Linear Algeb

GR1

Attributes: Research Intensive

Prerequisites: MATH 347 or MATH 577 and MATH 383; COMP 116 or similar is desirable

This course will introduce foundational mathematical concepts for machine learning through the lens of linear algebra. Topics will include a review of highlights of linear algebra, with a focus on the singular value decomposition, elements of numerical linear algebra, low rank matrices and compressed sensing, special matrices, like those that appear in the Fourier transform, and connections between linear algebra and key concepts in probability and statistics. Time permitting, we also shall discuss key concepts in optimization and applications to neural networks. We shall use the text, Linear Algebra and Learning from Data, by Gilbert Strang. The course will include substantial computing in MATLAB or Julia, although prior experience with either language is not required. Course assessments will focus on theoretical and computational exercises and projects.

This course does NOT require permission of the instructor only the prerequisites listed above. Please disregard the description stating that instructor

GR3

This course is an introduction to basic spectral theory and analysis. Functional analysis (Math 754) is strongly recommended as a pre- or co-requisite, although we will review necessary material as we go. Topics include: the spectral theorem and spectral measures; bounded, compact, and unbounded operators; Stone¿s theorem; Fredholm theory; applications in partial differential equations and scattering theory.

GR3

This is a required course for first-year MTSC graduate students. Students gain knowledge and learn key skillsets outside of their technical course work needed for success in their PhD program and beyond. MTSC711 follows on the topics learned in MTSC710 to broaden the professional development of materials science PhD students. Students work to develop an Individual Development Plan, to understand the variety of career paths available for PhD-holders, and to practice research presentations.
Grading status: H/P/L/F.

Class will meet in Murray Hall, room 1127.

GR3

The Seminar in Materials Science and Engineering is a required 1-credit course for all Materials Science students in fall and spring semesters of years 2-5 of their doctoral program. The course tracks attendance at the required APS departmental seminars. Attending departmental seminars is an important component of training for MTSC doctoral students. Engaging in the seminars will help students gain a working knowledge of a variety of research areas important to their doctoral research and to their future career.

Class Enrl Cap: 20 **Class Enrl Tot:** 3 **Class Wait Cap:** 999 **Class Wait Tot:** 0 **Class Min Enrl:** 0

GR3

This course covers the physical fundamentals of material science with in-depth development of the principles controlling the formation of the structure of engineering materials. Topics include crystal structures, defects, dislocation theory, thermodynamics and phase diagrams, diffusion, interfaces and microstructures, solidification and theory of phase transformation, and physical properties of hard and soft materials.
Grading status: Letter grade.

Attributes: VP- Visual or Performing Arts, CI- Communication Intensive, IDEA - FY - First Year Seminar
Class Equivalents: MUSC 63/63H

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

An exploration of UNC Chapel Hill's wonderful historical keyboard instrument collection through the study of music written for these very instruments between 1820 and 1900. Investigation of the historical and cultural context of music written during this era, as well as performance practice issues surrounding these instruments. Musical examples will include selected keyboard, vocal, and chamber works of Beethoven, Schubert, Chopin, Schumann, and others. The class will prepare, curate and present a concert of music on UNC's 1843 Pleyel at the end of the semester. No prior musical experience required. For keyboard players, string players, singers, and wind players, the class may involve a performance component.

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.

MUSC 390H.001 | Music and Politics
TR, 3:30 pm - 4:45 pm. Instructor(s): Stefan Litwin. Enrollment = 24.
The principle of "l'art pour l'art" (art for art's sake) has dominated much of the way we hear and understand music. Since its emancipation from the church and courts, western music has been viewed mostly as an aesthetic island immune to the influences of political reality. This seminar will examine the interrelatedness between music and society, focusing mainly though not exclusively on composers who sought to address political issues through their music. Some of Ludwig van Beethoven's most popular works, for example, among them the 5th symphony, were inspired by the French Revolution; Franz Liszt championed an early form of Christian socialism; and composers throughout the 20th century reacted to political turmoil, war and revolution by inventing a variety of new musical styles and compositional methods. During the course of the semester, through readings and research projects, we will trace these developments and examine how politics helped define music. No prior musical knowledge or abilities are required.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
PHIL 155H.001 | Truth and Proof: Introduction to Mathematical Logic
MWF, 9:05 am - 9:55 am. Instructor(s): Jason Roberts. Enrollment = 24.
Mathematical logic, a.k.a. symbolic logic, is a family of formal systems that were originally developed with the goal of shedding light on the philosophical foundations of mathematics. But it is also used to serve other purposes, including the analysis of philosophical arguments, the study of the structures of languages, and the study of the possibilities for automating different kinds of reasoning processes (and what we now call "computer science" started out as a branch of mathematical logic). In the standard PHIL 155 course, students are introduced to two systems of logic, called "propositional logic" and "first-order predicate logic." In the Honors version, we will cover those two systems much more quickly, leaving time to move on to other topics. In particular, we will look at some attempts to use symbolic logic to provide a foundation for mathematics, and we will learn the "Incompleteness Theorem" of Godel.

GR1

Class Equivalents: PHIL 390/390H

Philosophy of Action: On Trying, Persisting, and Quitting

There is a wide range of things that you and I do. In everything from flipping light switches to getting college degrees to going to the moon, we make things happen by way of our own agency. Impressive!

In this course, we will consider philosophical questions that arise in the context of complex agency¿that is, the sort of agency that we use to get college degrees and to get to the moon (but not necessarily when we flip light switches or satiate our hunger by making a sandwich). Understanding this kind of agency is important since it is behind the parts of our lives that we often care most about: making art, having romantic partnerships, raising children, nurturing communities, pursuing justice. Here are the questions we¿ll address: What does it mean to try? What does it mean to fail? Is it possible to rationally choose to do things that you should be quite confident will be difficult to do? What about things that we should think we are extremely unlikely
Prerequisite: 1 PHIL course.

PHIL 412 001 13453 PLATO Lecture 3 A
(Remote Only - Synchronous)
Bldg: TBA **Room:** TBA **Days:** W **Time:** 16:00 - 18:30 PLATO'S REPUBLIC

Attributes: PL- Physical and Life Science, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

FY LAUNCH LECTURE SECTION
This Lecture will be combined with other PHYS 118 sections, and it will be taught as a large survey class. PHYS 118-401, the studio lab associated with this class, is the FY-Launch section; Wei Zhang is the instructor of record for the lab. Please be sure to enroll in this class, PHYS 118-01F, and the corresponding lab, PHYS 118-401 to fulfill the FY-LAUNCH requirement.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
PHYS 231H.002 | Physical Computing
MF, 9:05 am - 9:55 am. Instructor(s): Stefan Jeglinski. Enrollment = 24.
Physical Computing is an introduction to the computing archetype known as the microcontroller. Microcontrollers are ubiquitous but mostly hidden in our lives ¿ they are the brains of almost anything electronic that you interact with ¿ virtually all appliances, vehicles, and consumer products that require any sort of input/output display, and/or remote connection or automation, and/or some degree of computation, contain at their heart a microcontroller.
A microcontroller is an electronic interface to the outside world. Its interface facilitates measurements of an environment and then controls that environment as needed. The environment can be either local (e.g., adjusting the speed of an automobile engine in response to an accelerator pedal) or remote (e.g., sensing the presence of a person in a room on the other side of the world and turning a light on in response). Microcontroller implementations use sensors and actuators, support electronics, and programing to accomplish these tasks.
Students that finish this course will be able to prototype basic microcontroller implementations using sensors, actuators, and support electronics, and

Reserve Capacity:		**Reserve Enrl Cap:**	**Reserve Enrl Tot:**
24-OCT-2021	UG FFYS Students	18	0
18-NOV-2021	UG FFYS Students	0	0

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

GR1

Please register for 1.5 credits for the MP Proposal Development class.

This seminar-based course will provide guidance to master's students as they begin work on their MP proposals. Students will be exposed to a variety of University resources, learn how to design and write independent research, and receive feedback on their ideas and project proposals. The course will combine visits from guest speakers, lectures, and breakout sessions. Some of the specific topics that will be discussed include: (i) navigating the IRB process; (ii) how to use Odum Institute resources; (iii) writing style for planning research; (iv) project scoping and time management; (v) research methods. Students will have the opportunity to work through potential research ideas as they craft and produce a draft MP proposal.

GR1

Please register for 1 credit for The Low-Income Housing Tax Credit.

Students will learn about nearly all aspects of the federal low-income housing tax credit (e.g., rents, costs, pro-formas, equity investment, requirements). The main focus is the developer perspective. Assignments will be based on real-world examples. The concepts are mostly financial, but public policy considerations are inherently connected and will be an integral aspect of the course.

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

TITLE: Ethics and Food Policy

IDEAS IN ACTION GEN EDS: FC-VALUES

COURSE DESCRIPTION
If you eat, you are impacted by federal, state, and local food policies. These policies are, in turn, shaped by values. Over the course of the semester, we examine the values that underpin different approaches to food policy, including food labeling, nutrition assistance, agricultural subsidies, and responses to food deserts.

Workshop open only to students who have received the APPLES Bryan Fellowship. Each fellowship team develops a project's underlying theory of change and the skills necessary for successful implementation. Students study the theories and implementation of one another's projects and external case studies.

This course requires instructor permission.

PLCY 340H.001 | Justice in Public Policy
TR, 3:30 pm - 4:45 pm. Instructor(s): Benjamin Meier. Enrollment = 24.
To paraphrase the American political philosopher John Rawls, justice is the first virtue of public policy. No matter how efficient or well arranged, laws and institutions must be abolished if they are unjust. Accordingly, some of the most basic questions of public policy are questions of justice: what goals should the government aim to realize? What means may it adopt to realize those goals? In this course, we examine the most prominent theoretical approaches to these questions: utilitarianism, contractualism, and rights-based views. We shall aim to determine whether governments should maximize individual welfare, or whether the proper role of government is to respect and protect the rights of its citizens. We shall also employ these theoretical frameworks to think through pressing contemporary policy problems, which may include economic justice and the design of welfare policy, the ethics of climate change, justice in immigration, the moral limits of markets, the role of religion in politics, and the ethics of whistle-blowing.

GR1

Attributes: PH- Philosophical and Moral Reasoning, GL- Global Issues
Combined Section ID: 1366(plcy570/hpm571.001) - HPM 571(#11551)

Course focuses on rights-based approaches to health, applying a human rights perspective to selected public health policies, programs, and interventions. Students will apply a formalistic human rights framework to critical public health issues, exploring human rights as both a safeguard against harm and a catalyst for health promotion.

Rules & Requirements
Making Connections Gen Ed: PH, GL.
Grading Status: Letter grade.
Same as: HPM 571.

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
PLCY 581H.001 | Research Design for Public Policy
TR, 3:30 pm - 4:45 pm. Instructor(s): Carmen Gutierrez. Enrollment = 24.
All evidence is not created equal. The best evidence comes from good research. Research in the social sciences, especially public policy, informs debates that affect our day-to-day lives. However, these debates are often awash in normative or ideological shouting matches. We as policy researchers have the opportunity to inject such debates with reliable evidence based on well-crafted, carefully executed, defensible research. In this course, we will examine the attributes that separate strong from weak research in public policy. We will learn the nuts and bolts of applying the scientific method to questions of policy significance ¿ and focus on the critical use of analytic tools to uncover causal relationships.

Policy research is broadly concerned with effectiveness (i.e., did the policy/program have the intended outcome(s)?), efficiency (i.e., was the outcome achieved at an acceptable benefit-cost ratio?), or equity (i.e., were the benefits and costs of the policy/program justly distributed across individuals?).

Thinking About Law Description
Are you interested in being a lawyer or public official? Do you know what it means to ¿think like a lawyer?¿ Have you considered why people mostly honor the law? Where do you find ¿the law?¿ How do judges decide difficult cases? This seminar will explore the notion of a rule of law, formal and customary law, legal analysis, judicial interpretation and the realities of the adversarial system and law practice. We will consider what makes law seem legitimate and how to assess whether it promotes liberty and justice. This seminar will challenge students to be reflective and critical about their own perspectives and to explore personal responsibility for promoting a rule of law. Students will be engaged in analytical thinking and expression through required participation in teacher-led dialogues based on assigned readings and with research and writing assignments. Reading materials include selections from court cases and other sources that provide an introduction to the notion of a rule of law, the sources of law that govern us and protect our individual rights, the nature of legal analysis, the different methods of judicial interpretation, and the realities of law practice and the adversarial system.
WHO CAN ENROLL IN THIS CLASS?

TITLE: Global Politics of Climate Change
IDEAS IN ACTION GEN EDS: FC-GLOBAL

DESCRIPTION
This course is designed to provide an introduction to the politics of climate change at multiple levels of policy making, from global efforts down to local communities. Throughout the course, climate policy is investigated as a result of the interplay of science and politics. At each level of politics ¿ global, regional (EU), country (US), sub-national (US states), and local (regional and city) ¿ students will have the opportunity to review existing policy approaches, explore official inter-governmental and governmental policies, and read social science analyses. In addition, at each level, a scientific expert and/or activist will visit class to interact on climate issues. Student participation is required, with the format for class meetings combining a mixture of lectures and discussions as well as expert and activist speakers, video resources, and group presentations.

TITLE: Introduction to Constitutional Conflicts
IDEAS IN ACTION GEN EDS: FC-VALUES or FC-KNOWING

DESCRIPTION
This seminar will introduce students to the issues, arguments, history, impact, and reasoning arising from or in conflicts between presidents and Congress. The constitutional conflicts that are the focus of the course involve presidents and Congress fighting for primacy in areas in which they have shared constitutional powers.

WHO CAN ENROLL IN THIS CLASS?

POLI 100H.001 | Introduction to Government in the United States
TR, 9:30 am - 10:45 am. Instructor(s): Jason Roberts. Enrollment = 24.
This course is an introduction to American political institutions, political behavior, and the policy process. In this course we will discuss the origins of the current governmental system in America, the structure of the U.S. government, and how theories of American government apply to current events and problems the government and citizens face today.

Jason M. Roberts is a Professor of Political Science and a member of the Orange Co., NC Board of Elections. His research centers on American Political Institutions with a focus of legislative voting, parliamentary procedure, and election administration

Launch (Class Section)
Class Equivalents: POLI 130/130H

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and

POLI 255H.001 | International Migration & Citizenship
TR , 2:00 pm - 3:15 pm. Instructor(s): Junghyun Lim. Enrollment = 24.
International migration has been one of the most contested issues in many countries. And this is complicated by the fact that never before have so many people had the ability to move from one country to another, while governments have never had so much power to control this movement. In 2020, about 3.6% of the global population lived in countries where they were not born, and this number is projected to grow further. This class explores the economic, political, and social dimensions of the movement of people across borders. The class is primarily based on discussions and tackles important questions like: What are the political, economic, and social consequences of migration? How do immigrants affect both the identity of immigrants and natives? How should citizenship be allocated? No prior knowledge or experience is needed; instead, students need to be ready to delve deep into diverse aspects of migration issues through reading, writing, and discussion. This class encourages students from a wide range of backgrounds, experiences, and perspectives to enroll because it significantly benefits from such diversity.

POLI 469H.001 | Conflict and Nationalism in the Former Yugoslavia
TR, 11:00 am - 12:15 pm. Instructor(s): Robert Jenkins. Enrollment = 19.
This course focuses on factors leading to the breakup of communist Yugoslavia, the nature of conflicts in this territory throughout the 1990s (and after), political developments since those wars, and the various efforts of the international community to end violent conflict and promote post-conflict reconstruction and development. We explore how ethno-nationalist identity and mobilization have developed and transformed up to the most recent events. We will also examine the evolution of international intervention from attempts to stop war in the 1990s to current prospects of EU membership.

This course is aimed at students interested in nationalism, state building, intervention into ethnic conflict, and post-war conflict resolution as well as Southeast Europe and the European Union. Beyond developing familiarity with major socio-political themes and gaining detailed knowledge of the Yugoslav case(s), a key goal of the course is to give students an opportunity to develop their oral and written presentation skills. No background in Yugoslav

POLI 490.001 - Networks in International Relations
The modern international system is a highly-connected, interdependent network of people, non- state actors, and governments. Networks of international travel facilitated the spread of a novel disease, creating a global pandemic in a matter of weeks. Interruptions to the complex network of global supply chains has caused shortages in microchips affecting the production and delivery of a wide array of products. Diplomatic efforts to build new alliances and reinforce old ones are shifting networks of military capabilities. Network analysis provides methods for researchers to understand and analyze these connections. The course will introduce key concepts from network analysis to provide the conceptual and methodological tools to analyze networks in international politics. We will draw on recent International Relations scholarship to examine how networks bestow power and influence on certain actors; how flows of information, finance, and disease diffuse across networks; and how the structures of various networks generate ¿emergent properties¿ that can facilitate or hinder international cooperation. Students will also learn statistical tools used to analyze and visualize network data.

Transatlantic Politics of Climate Change (POLI 490.200)
Spring 2024

The course focuses on comparative approaches to climate policy in the European Union (EU) and the United States (US). Brief attention will be given to the science underlying climate policy. The course will then address the evolution of environmental, energy, and climate policy in the EU and US. EU member state and US state-level policies will also be addressed. In addition to examining concrete policy outputs, analysis of the underlying political processes producing policies will be a key component.

POLI 490.201 Political Corruption: theoretical, comparative and international perspectives

Political Corruption has been a ubiquitous phenomenon at all times and in all political systems whether in democracies or autocracies, in liberal or illiberal regimes. Populist movements of all colors utilize the narrative of "the corrupt elites versus the pure masses." Many corruption cases in recent decades have been linked to questions of party, campaign and political finance in general. Perspectives on the common good, responsive politics and constituency service are utilized to delimit the concept theoretically. This seminar will focus on political corruption from a comparative and international relations perspective. After a theoretical reflection on the phenomenon, we will explore its history, causes, effects and efforts to combat corruption. Special attention will be given to the comparative analysis of corruption cases (mainly in western democracies). International anti-corruption policies

Local Political Economy
Please contact Millie Tan (millie.tan@unc.edu) with your PID and she will enroll you in this class to ensure you enroll for 3 credits.

Subnational governments sit closest to the people in federal systems and have a key role in deciding who gets what, where, and when. This course examines the politics of these governments and the policies they produce from a political economy perspective: examining the interactions between the economic and political power of groups in society. We examine contemporary works covering topics on institutional development, clientelism and the distribution of public goods, parties and elections, spatial inequalities, race and ethnicity, and intergovernmental interactions. Readings cover the political science subfields

of American and comparative politics as well as economics, sociology, and related disciplines.

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
NSCI 222H.001 | Learning
TR, 11:00 am - 12:15 pm. Instructor(s): Todd Thiele. Enrollment = 24.
This course is designed to introduce the student to the topic of animal learning and behavior. We will consider Pavlovian or ¿Classical¿ learning, operant learning, and the role of learning in drug abuse and dependence. Students will acquire knowledge of the procedures used to study learning, the ways that learned behaviors are expressed, and theories that have been proposed to explain how learning is represented in memory. Because neuroscience has had such a tremendous impact on our understanding of learning, memory, and behavior, we will also consider new findings from neuroscience that have allowed an understanding of the underlying brain substrates.

PREREQUISITE: NSCI 175 or PSYC 101.

NSCI 490: Animal Perception

Prereqs: NSCI 225
This course will focus on discussing and identifying how animals¿ ¿umwelt¿ (perceptual experience of their environment) may differ from ours and how differences in their sensory receptors, sense organs, etc. lead to these differences in experience. We¿ll look at each sense, and explore how various animals may have differences in each of these senses (including the senses we share and unique senses like echolocation, magnetoreception, etc.)
This course has prerequisite requirements.
The last day for students to add themselves to the waitlist is Tuesday, January 16.
27 seats are restricted to Senior PSYC majors and NSCI majors and 3 seats are reserved for Cog Sci Minors through wave 1. In Wave 2 remaining seats will be reserved for Senior PSYC and NSCI Majors. On November 17, remaining seats will open to Junior and Senior PSYC majors and NSCI Majors/Minors. On January 17 any remaining seats will also be available to Sophomore PSYC and NSCI Majors/Minors.

PSYC 490: Culture and Development (3)
Instructor: Dr. M. Dalal Safa (001)
Prerequisites: PSYC 101, PSYC 210 or 215, PSYC 250 or 260
An examination of research and theory pertaining to the intersections of culture, ethnicity-race, and development. Specifically, this course focuses on identifying limitations and advances in psychological and developmental sciences toward our understanding of ethnic-racial minoritized and immigrant youth development in culturally bounded contexts (e.g., families, schools, and neighborhoods) within and outside the U.S. The course is recommended for students interested in engaging in rich dialogue and self-reflection.
This course has prerequisite requirements.
The last day to add to a wait list for the spring semester is Tuesday, January 16.
Seats will be restricted to Senior PSYC and NSCI Majors during Wave 1 and 2 of registration. Beginning with open enrollment on November 17 the course will open to Junior and Senior PSYC and NSCI Majors. The course will open to Sophomore PSYC and NSCI majors on January 17.

Title: Psychology of Race and Racism
Pre-reqs: PSYC 101, and either PSYC 210 or 215
Course description: This course offers an overview of research investigating the psychological underpinnings and impacts of racialization, racism, and

racial inequality. It will center research in social psychology, but will also feature work from other areas of psychology (e.g., developmental), as well as other social science disciplines (e.g., sociology, political science).
This course has prerequisite requirements.
The last day to add to a wait list for the spring semester is Tuesday, January 16.
Seats will be restricted to Senior PSYC and NSCI Majors during Wave 1 and 2 of registration. Beginning with open enrollment on November 17 the course will open to Junior and Senior PSYC and NSCI Majors. The course will open to Sophomore PSYC and NSCI majors on January 17.

title: Gender and Development
Requisites: PSYC101, PSYC210 or 215, and PSYC250 or PSYC260.
description: This course examines the role of gender in child and adolescent psychosocial development, with an emphasis on research methods in developmental psychology. Topics include socializing agents of gender development (e.g., parents, peers, media); conceptions of gender, masculinity, and femininity; experiences of youth at different intersections of gender and other identities (e.g., race/ethnicity, sexual identity); and the influence of gendered social roles in developmental outcomes (e.g., preferences and traits, academic outcomes, sexual behavior, mental health).
This course has prerequisite requirements.
The last day to add to a wait list for the spring semester is Tuesday, January 16.

PSYC 490: Psychotherapy: Practice and Research
Prerequisites: PSYC 101
This is an introductory course in psychotherapy, or the treatment of psychological problems through the application of interventions grounded in psychological theory and focusing on behavior or mental processes. Students will become familiar with the more popular schools of psychotherapy, including

their historical context, characteristic techniques, theoretical underpinnings, and current research support. For example, students will be able to identify the broad school of psychotherapy being used by a given clinician during an interaction with a client. Students will also gain an appreciation of the problems and solutions in researching psychotherapy, as well as emerging variations on psychotherapy procedures.
This course has prerequisites.
The last day to add to a wait list for the spring semester is Tuesday, January 16.

Attributes: IDEA-Creative Expression, Practice, and Production

Instructor: Dr. Andrea Hussong (001)
Prerequisites: Psyc 250
In this upper-level course, students will learn about the interdisciplinary field of Positive Youth Development and create a digital tool to improve health, well-being, or developmental outcomes for youth through an intensive semester-long project. This course is designed so that by the end of the semester you will be able to: apply Positive Youth Development and Prevention Science frameworks to identifying points of intervention that promote youth thriving; understand design-based processes and universal design practices as key tools in creating technology-based interventions for youth; learn and apply technical skills in a single digital medium to support development of a program prototype; create a prototype tool that meets a clearly defined intervention goal for a given community-based collaborator; and present the science-based rationale behind the program created to community-based partners. This class is part of the IDEAs in Action curriculum and requires students to explore creative processes that underlie the creation of empirically-informed content and digital intervention platforms. Finally, this course aims to provide you will experiences and tools that are valued in the marketplace such as using

Attributes: LA- Literary Arts, CI- Communication Intensive, GL- Global Issues, IDEA-Creative Expression, Practice, and Production, IDEA - Global Understandi
Engagement, IDEA - FY - First Year Seminar
Combined Section ID: 1451(asia/pwad69.001) - ASIA 69(#14118)

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
PWAD 469H.001 | Conflict and Nationalism in the Former Yugoslavia
TR, 11:00 am - 12:15 pm. Instructor(s): Robert Jenkins. Enrollment = 5.
This core course explores the background, history, and aftermath of recent conflicts in the Balkans and attempts by international organizations to secure peace and rebuild states in the region.

Robert M. Jenkins is a Teaching Professor in the Department of Political Science at the University of North Carolina at Chapel Hill. A long-time specialist in Central and Eastern Europe, his expertise also includes the European Union., South Africa, and the successor states to the Soviet Union. His current research includes projects on the social bases of populism in post-communist Europe and international intervention into the post-conflict Western Balkans. Dr. Jenkins is committed to study abroad programs, leading semester programs in Brussels/London (2022, upcoming 2023), Cape Town (2013, 2016), and a long

running summer program in the Balkans and Vienna (since 2002, upcoming 2023).

PWAD 490.040 - When the Cold War ended about 1989, it seemed to many that the triumph of the ideologically democratic, economically free market countries led by the United States was decisive. There was an expectation that the Soviet Union, the primary antagonist during the Cold War, would embrace these approaches, that China¿s opening to the world would move it in the same direction, and that the smaller countries around the world that were still authoritarian and autarkic would fall in line. The George H.W. Bush administration spoke of a New World Order, and the Clinton administration that followed it embraced a foreign policy of ¿Engaging and Enlarging¿ the world with the expectation of progress towards democracy and free market economies.

Consistent with these beliefs, hopes and expectations, the United States reduced its military force by about a third, but struggled with concepts of how that reduced force would be used. It became quickly apparent that the new world order would not move towards peace, democracy and global free markets on its own. Successive administrations decided to use the smaller military force to put down challenges to the order. As it has turned out, the armed forces of the United States were far more active than they had been when facing the Warsaw Pact.

The war and ongoing conflicts in Iraq have dramatically impacted international relations in the 21st century. This course will focus on developments in Iraq since 1920, with a survey of the Iran-Iraq War, the 1990-91 Gulf War, and then finally the 2003 invasion, regime change, and subsequent civil war that led to the rise of the Islamic State, ISIS.

PWAD 490.041 is reserved for PWAD majors during Wave 1 and Wave II of Registration (until Nov 16). Available seats will be released to both PWAD majors and non-majors at the beginning of Open Enrollment (Nov 17). COURSE TITLE: Confronting Antisemitism

CAROLINA AWAY PROGRAM
JWST 390-001 is connected with the Carolina Away program.

COURSE DESCRIPTION
This course takes a broad look at antisemitism in history, our contemporary world, and at UNC. Class sessions will feature guest speakers and discussions on different aspects of this persistent form of hatred. The class offers a unique opportunity to explore the humanities and social sciences, meeting with faculty from English, History, Religious Studies, Psychology, German Studies and other fields. Students will hear firsthand testimony about individual experiences with antisemitism in Europe and the American South. Learning about the interconnections among Antisemitism and other forms of intolerance,

TITLE: Lux Libertas: On the Understanding and Handling of Light

COURSE DESCRIPTION
Light has figured centrally in human explanations and manipulations of the natural world: from creation narratives, to the Copernican Revolution, to the theory of relativity, to harvesting energy from sunlight, to shaping light inside phones and screens for the capture and display of images. The goal of this course is to bring students into an intellectual encounter with light, one that will provide a history of human understandings of light, experimental encounters with light in the laboratory, and orientations to theoretical paradigms that have resulted from the human manipulation of light. At its most broad, the course aims to introduce first year students to knowledge and matter-energy as things that we study, handle, and transform.

WHO CAN ENROLL IN THIS CLASS?

RELI 161H.001 | Introduction to the History of Christian Traditions
TR, 11:00 am - 12:15 pm. Instructor(s): Yaakov Ariel. Enrollment = 24.
The course provides historical, theological and cultural knowledge on the rise and development of Christianity from its earlier generations to the 21st century. We will look at the diverse forms and shapes that Christianity has taken in various eras, regions, communities, and political systems, and, in its turn, how Christian beliefs have influenced social, economic, intellectual, and artistic developments all over the globe. The course focuses, therefore, on a central topic in world history and offers, among other things, an introduction to the religious and cultural map of our time. Another goal is to understand the roots of the rich and diverse contemporary Christian scenes. The course should help students comprehend the nature of Christian movements and churches, their varied liturgies, hierarchies and tents of faith, as well as their different stands on political and cultural issues.

RELI 217H.001 | Gnosticism
TR, 2:00 pm - 3:15 pm. Instructor(s): Zlatko Pleše. Enrollment = 24.
This multidisciplinary course offers a comprehensive survey of ancient Christian `Gnosticism¿, one of the earliest and most long-lived branches of early Christianity, notorious for its promise of personal salvation through a firsthand knowledge (gnosis) of the divine. Principal readings are drawn from the famous ¿Nag Hammadi Library,¿ a manuscript hoard buried at the time of official suppression of `heretical¿ sects around 350 CE and discovered in 1945 by two Egyptian locals. In this course, students are expected to develop expertise, in textual analysis and broad interpretation, of ancient Gnostic myth and to acquaint themselves with various denominations within Gnostic Christianity, their doctrines, and their ritual practices. We will situate the ancient Gnostics in a complex network of early Christian groups and their conflicting ideas about orthodoxy, authority, and canon, as well as identify religious, philosophical, and literary traditions that helped to inform the basic tenets of ancient Gnosis. The course concludes by focusing on modern uses and misuses of the term `gnosticism¿¿a broad category including the poetry of William Blake, the fiction of Kafka and Melville, psychoanalysis, the New Age movement,

RELI 224H.001 | Modern Jewish Thought
TR, 2:00 pm - 3:15 pm. Instructor(s): Andrea Dara Cooper. Enrollment = 24.
The purpose of this course is to explore the role of philosophy in modern Judaism. We will examine how contemporary thinkers have considered philosophy, ethics, and theology from a Jewish perspective. Methodological points to be addressed include: the role of interpretation in Judaism, revelation and redemption, authority and tradition, pluralism and inclusion, suffering and evil, Jewish philosophy in conversation with feminism, gender, race, and colonialism, and contemporary approaches to transcendence.

Questions to be addressed include: Are faith and reason compatible? In what ways have contemporary thinkers understood theology, the study of God, from a Jewish perspective? Should a Jewish thinker be read within an exclusively Judaic framework? This course will consider these methodological questions as starting points for inquiry.

Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
RELI 248H.001 | Introduction to American Islam
TR, 11:00 am - 12:15 pm. Instructor(s): Juliane Hammer. Enrollment = 24.
This course provides an introduction to the presence of Muslims in the United States through both historical and thematic inquiry. We start with a historical survey spanning enslaved African Muslims brought to the Americas in the antebellum period to the ongoing marginalization of US Muslims in the first two decades of the 21st century. We then explore in thematic units topics such as American Muslim communal and demographic diversity, political and civic organizations, political participation, religious practices as well as family, education, knowledge production and cultural diversity. Special attention will be paid to questions of gender, race, and citizenship, as well as to issues of religious authority and authenticity. The course engages diverse materials within the contexts of both American religious history and Islam as a global religious tradition.

RELI 315H.001 | Religious Frauds: Lies, Forgeries, and Fake News
M, 12:00 pm - 2:50 pm. Instructor(s): Hugo Enrique Mendez. Enrollment = 24.
This course explores the problem of religious fraud-and more specifically, "pious fraud"-drawing case studies from Christian history. Although Christianity espouses a high moral code, some Christians have used deception to advance their beliefs and agendas: forging documents, inventing stories, and fabricating artifacts. Others have been suspected of these same activities. Throughout the semester, students wade through the thorny moral/ethical issues presented by the practice of pious fraud and debate possible cases.

TITLE: Discovering Animals: Culture and Creativity

IDEAS IN ACTION GEN EDS: FC-AESTH or FC-CREATE

COURSE DESCRIPTION
Animals have been central to the human imagination since the days of cave paintings. They have always played key roles in the way we connect with the world. We dream about them, we connect with them in our myths and stories, and we embrace them in our everyday lives. In this seminar, we will explore many animal stories together and learn to create new ones, attempting to envision the world from their perspective. Students will read literary and scientific texts, watch films, and be encouraged to write about (or on behalf of) animals, expanding their creativity to the nonhuman realm.

TITLE: Sense of Wonder: Energy and Science Fiction

IDEAS IN ACTION GEN EDS: FC-AESTH

COURSE DESCRIPTION
This course is dedicated to the following, twinning questions: 1) How do we define energy in the literary humanities and 2) What is the ecological value of science fiction (SF)? We will answer these questions by turning to the history of French and francophone SF literature and media, calling on French philosophy and contemporary theory from a diversity of fields¿including art history, anthropology, and cosmology¿for supplement. Beginning with Cyrano de Bergerac¿s proto SF, we will move through Jules Vernes¿s scientific romance, Auguste Villiers de l¿Isle-Adam¿s symbolism, Maurice Renard¿s SF about invisible aerial aliens, Raymond Queneau¿s surrealist anticipation of the new novel, Monique Wittig¿s queer apocalypticism, countercultural comics, Ahmed

Honors Carolina students can register themselves for SPRING 2024 online when their registration appointment begins.
Non-Honors students will be eligible to enroll beginning November 17 during open enrollment.
SPAN 301H.001 | Introduction to Literary and Cultural Analysis
MWF, 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 11.
This course is designed for students in the Honors Program, who have been recommended by their SPAN 261 instructor, or who have received the approval of the SPAN 301 course coordinator. The course prepares students to analyze texts in at least three different genres (theater, poetry, essay, narrative, or film), within a cultural context. In this process, students will improve their language proficiency in Spanish as they are exposed to different world views through the study of literature and culture. SPAN 301H differs from SPAN 301 in several ways; writing assignments are more challenging in terms of length and research expectations, and students use a Spanish conversation digital platform to further practice their Spanish skills speaking with native speakers. In addition, students also work on a creative, non-traditional, final project (a musical composition, an original short story, a graphic text, or any other cultural project based on their academic interests and inspired by our readings and discussions). The course also integrates cultural events outside of the classroom such as movies, guest lectures, art exhibits, or performances as part of class participation.

SPAN 301H.002 | Introduction to Literary and Cultural Analysis
MWF, 11:15 am - 12:05 pm. Instructor(s): Cristina Carrasco. Enrollment = 11.
Dr. Cristina Carrasco is a native of Valencia, Spain, and has an M.A in Comparative Literature from the University of Iowa and a PhD. in Hispanic Literature from the University of Texas at Austin. Her research focuses on contemporary Spanish and Transatlantic studies. Building on her doctoral work on the autobiographical metafictions of Miguel de Unamuno, Rosa Montero, Enrique Vila-Matas, and Juan José Millás, she examines the ways in which contemporary hybrid genres continue to reconfigure Spanish and Latin American literature in an age of globalization and new cultural mestizajes. She is also interested in Transatlantic cinema and literature, particularly in texts that address recent immigration to Spain, exotic representations of marginalized groups, and

transnational identities in the Iberian Peninsula. Her current research project explores Spanish and neocolonial representations of Latin America in contemporary Spanish women¿s narratives.

FIRST-YEAR LAUNCH SECTION

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Foundations classes

Attributes: SS- Social and Behavioral Science, IDEA - FY - First Year Seminar

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

SOCI 057H.001 | Rationalization and the Changing Nature of Social Life in 21st-Century America
TR, 9:30 am - 10: 45 am. Instructor(s): . Enrollment = 24.
Today, fast food restaurants have become a model for everyday life. Some scholars have even talked about the "McDonaldization" of the nation and the world. By that, scholars mean a drive toward greater efficiency, predictability, calculability, and control by non-human technologies in modern organizations. This drive has shaped many features of American life, including health care, law, and education. Such forces have even affected personal relationships. Sociologists have a term for this process: "rationalization." We will explore ¿rationalization¿ through a process called "active learning" in which you will have opportunities to explore online resources, engage in peer-to-peer discussions, and work with me to develop a research project in which you explore the impact of rationalization on an occupation that might be a destination for you. We will spend one class period, every other week, working on the term paper in class. We will have four or five guests, sharing their expertise on how rationalization has affected their work. You will be assessed based on your contributions to blog posts, class discussion, short answer written assignments, and a research project culminating in a term paper (15-20 pages). You will

TITLE: BLACK FEMINISM
IDEAS IN ACTION GEN EDS: FC-POWER

DESCRIPTION
Black Feminism is a first-year seminar that introduces students to black feminist theory and praxis. In this course, we will explore central themes and conversations around intersecting systems of domination. We will critically interrogate power and how inequality shapes policies, institutions, and our day-to-day lives. Topics will include (1) black feminist theory: past and present; (2) carcerality and violence; (3) resistance and solidarity; and (4) abolition and belonging. Students will develop critical analytic, research, and writing skills while thoughtfully engaging with interdisciplinary theories of black feminism.

This class reserved for STAN majors/minors. Prerequisites: STOR 120, STOR 320, or STOR 455. Reserve will be removed in January. Modern statistics introduces a number of normative issues. Concerns surrounding algorithmic bias, data privacy, and methodological transparency arise from our methods, but our methods are not capable of fully ameliorating them. A more complete answer must be sought in moral philosophy. This class is purposefully positioned at the intersection of these two disciplines and will combine practical application of statistical techniques with open discussion of philosophical principles used to adjudicate remaining ambiguities.

The focus of this course is on methodology and theory for high-dimensional time series. Topics to be covered concern many recent statistical approaches when extended to modeling large complex systems evolving over time, and include sparse vector autoregressions, dynamic factor models, discrete-valued, neural network and other non-linear models, high-dimensional estimation and testing, and others.

Stochastic Modeling, Analysis and Design for Health Care Operations. Description: This 3-credit advanced course introduces stochastic modeling, analysis, and design techniques commonly used in modern health care operations. We will discuss popular methods from stochastic decision making such as sample-path analysis, stochastic dynamic programming, and reinforcement learning applied to health care operations. Various applications will be covered including scheduling of resources in hospitals (e.g., operating rooms and appointment slots), triage and prioritization in health care, and emergency response planning. Knowledge of basic probability and stochastic processes at the level of STOR 641 is required.

This course provides a broad overview of health care in the United States from a business perspective. Students will be introduced to the structure and component parts of the health care system and will study basic economic issues, public policies, and market developments as they impact the industry and the delivery of care and services. We will explore the four P¿s of healthcare ¿ providers, payers, producers, and patients. The class will include a mix of cases, articles and guest speakers to examine different aspects of the health care value chain.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

Attributes: IDEA - FY - First Year Seminar
Reserve Capacity: 01-OCT-2023 UG Freshman or FY Students **Reserve Enrl Cap:** 23 **Reserve Enrl Tot:** 23

WHO CAN ENROLL IN THIS CLASS?
Seats are restricted to first-year students (and transfer students in their first year at UNC who completed <24 hours of post-high school college coursework at another institution before their first semester at UNC). If you are a transfer student, refer to the UNC Catalog (https://catalog.unc.edu/undergraduate/ideas-in-action/#transferstudentstext) for additional information. Honors first-year students may not enroll in this class; they should only enroll in an Honors First-Year Seminar or Honors First-Year Launch.

ENROLLMENT PROCEDURES
Students may only enroll in one (1) First-Year Seminar OR (1) First-Year Launch during their time at UNC. Please note that First-Year Seminars and First-Year Launches do not have waitlists.

Non-SILS students are allowed to register for INLS 151, 201 and 161. However, seats are prioritized according to year (freshman, sophomore, and junior). If you receive a `reserve capacity not met¿ error message for an open course (green dot), it means that all seats reserved for your year are currently filled. You must add yourself to the waitlist in Connect Carolina, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available. Seniors are not allowed to enroll in these 3 courses.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

Non- SILS students are not allowed to register for all other INLS courses as they are restricted to INLS major, minors and graduate students during early registration. NON-SILS students will need to add yourself to the waitlist in Connect Carolina for the course you are interested in, as we will not be keeping an internal waitlist. We will enroll from the waitlist as seats become available.
*Undergraduates can only be on one waitlist at a time and 17 hours is the max during early registration.
**We will begin to fill available seats from the waitlist in mid-December. If you are not waitlisted, you will not be allowed to enroll.

MEJO 447H.001 | Media in the UK: London
TR, 9:30 am - 10: 45 am. Instructor(s): Lucinda Austin. Enrollment = 18.
Today¿s communication and media professionals are called upon to work with diverse markets, audiences, publics, and stakeholders from around the world. To help prepare you for a career in the dynamic international world of communication, this class will introduce you to the British media market, including a spring break trip to London. Prior to the London trip, you will learn about the history of media and communication industries in the United Kingdom, exploring both similarities and differences with those in the United States. You will consider how media industries interact with political, economic and cultural forces. You will travel to London to engage with and learn from communication and media professionals in news and strategic communication companies. You will also interact with students and faculty at City University London in an effort to expand your global perspectives about the complexities of communication messages and strategies. During the course, you will focus on your chosen area of specialization (journalism, public relations, advertising, graphic design, etc.), but you will also be fully engaged with students who are specializing in other areas. In addition to
